

EAGLE CENTER NEWSLETTER

The publication of C-EB's E.A.G.L.E Center

April 2010: Volume 1, Number 3

Well, do we finally have spring? I'm sure we are all hoping so! It has happened so fast, and just when most of us were probably thinking winter would never end. When the snow we got last Friday morning was gone within just two days, we knew for sure that the change had come!

This is our last issue of the E.A.G.L.E Center Newsletter for the year, and then our last class project will be to put together a yearbook for the EC. All students are welcome to help, whether or not you

are registered for Fine Arts this semester. We will have a meeting soon to plan, and we need to start taking class pictures, so come to school and help us decide on dates.

Contributing to this issue were Ariel Bartlett, Darris Mesteth, Jason Moran, Richard Rousseau, Christian Thompson, Cameron Wright, and A'Layna Redfox.

The Fine Arts class for next year will be keeping up the ECNL for next year, and hopefully printing a few more times. We want to

know how we can do better. How could we make the newsletter more interesting? What other columns and features would you like to see added? Talk to Miss Osthus with your ideas or to ask about being on staff this fall, or e-mail us at ECNL0910@gmail.com.

Enjoy the lovely weather, but don't let spring fever overwhelm you. Remember that there is still plenty of work left to be done, and you will enjoy your summer more if you don't have work hanging over your head!

This picture was found on Wordpress.com, and though we don't have many cherry trees around here, it is a very springy picture, isn't it? I can almost smell the blossoms!

STAR PAGE

Heather Murphy

Ms. Murphy has been a E.A.G.L.E. Center social studies teacher for three years. Ms. Murphy is a C/O 2001 high school graduate from West Holt High School in Atkinson, Nebraska. She went to college in Chadron, Nebraska and received both her master's and bachelor's degrees there. Ms. Murphy's family consists of her father, mother, brother, and a significant other.

Her hobbies include reading, watching television, and taking walks. Her favorite class to teach is U.S. History or World History because it is very interesting. She enjoys all kinds of music and enjoys watching romantic comedy movies. Chocolate and Diet Pepsi are some of her favorite foods.

If she could go anywhere in the world she would go to Europe because she would like to see what she has learned about and what she gets to teach. The best thing for her about being a teacher is helping students learn. One thing that has changed since she was in high school is that just about everyone has a cell phone. Advice she would give to the younger students would be not to leave English work until the end of the year.

All in all, Ms. Murphy is a fun and cool teacher to have. She is also very smart and can help students with any kind work if they ask for help.

Senior Profile

Christian A. Thompson

Hello, my name is Christian Thompson and I am a senior at the E.A.G.L.E

Center. This is my first and last year here at the E.A.G.L.E. Center. I've been going to school in Eagle Butte most of my life, and the other schools that I've gone to are in White River and Albuquerque, New Mexico. After high school I am thinking of attending college at Morris, Minnesota or at Haskell, Kansas.

The things I like are watching basketball when the Bulls or Celtics are playing, walking around, texting, getting on the computer and playing with my nephew outside. I also like to watch baseball, football, CSI, and Law & Order.

My dislikes are any kind of bugs that crawl, such as spiders. That is my most hated thing that I do not like.

My goals are to finish high school and go to college. When I am done with college I want to join the navy.

THE FIELD TRIP

We had a blast on our trip to “Take a Peek at PC.” The trip was open to juniors and seniors, and Justin High Elk, Jared Moran, Mercedes Dennis, and I (Cameron Wright) represented the E.A.G.L.E. Center. When we first got there we got separated into three groups and they had three labs for us to go to. My group went to the nurses’ lab first, where they had some kind of shaky vest deal and a

dummy. The dummy had real human reactions—he could breathe and had a pulse, and he also could blink. They use the dummy to teach first aid.

After that lab we went to the next one, which was the chemistry lab. The most interesting thing they did there was make a smoke bomb. We all had lunch after visiting two labs. They made us some Indian tacos and brownies and they had lemonade to drink.

Then after lunch we went to our last lab, which for my group was the cadavers. It was pretty sick, I tell you. The women that showed us were scholars and came from Aberdeen. They had buckets full of eyeballs and lungs and they also had this cadaver with a bullet hole in it. At the end of the day they gave us T-shirts and sent us on our way. It was a good experience, and we had a blast.

Know of a good college that everyone should check out? Tell the Fine Arts class about it at ECNL0910@gmail.com, and we might just feature your school next year in the newsletter!

ART RAGE

And a sad update on Miss Osthus' favorite example of South Dakota art—the cars of Clark may soon become submerged if we get any more rain!
